

# Digital Documents On-demand

## Physiotherapists Online Safe

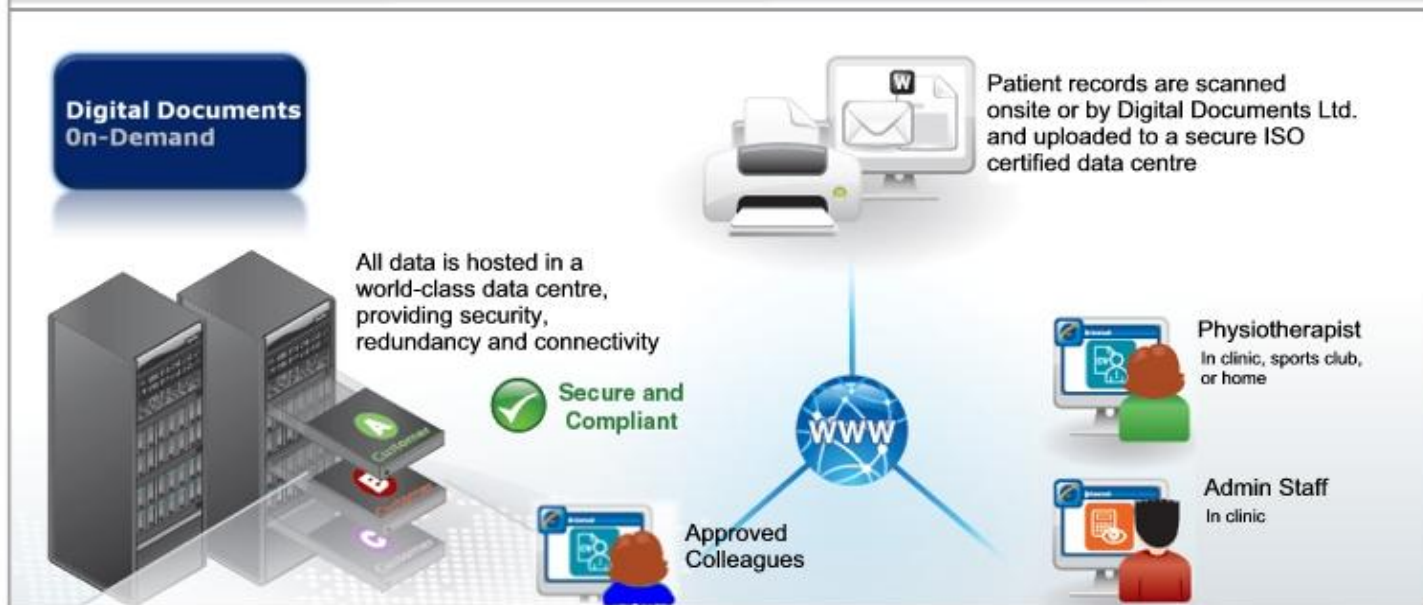

Traditionally patient records have been stored in paper filing systems or computer hard drives. Although this has worked well in the past, these systems are not without their challenges and risks.

Easy to use and simple to set up, Digital Documents on-demand is a hosted service that enables physiotherapists to securely access patient records from anywhere. Digital Documents on-demand will facilitate physiotherapists to view complete patient

records from a clinic, sports club, or home. If necessary, other authorised colleagues can share access and collaborate on the same patient records.

One major fear associated with traditional paper filing systems and computer hard drive storage systems, is the risk of fire or water damage. Digital Documents on-demand eliminates these risks.

### How it Works

#### Key Features:

- ✓ Secure, confidential, and compliant
- ✓ Simple view, print and email functionality
- ✓ No hardware capital expenditure
- ✓ Proven technology used by leading medical organisations
- ✓ Maintains audit trail and version control regardless of disaster

#### Key Benefits:

- ✓ Instant access to patient records, correspondence, notes etc. from anywhere
- ✓ Removes storage costs
- ✓ Protects patient records in the event of disaster
- ✓ Low monthly cost
- ✓ Simple to use
